PROFILE

Computer Science student with 3+ years of experience in building web and software applications. Skilled in frontend and backend technologies including JavaScript, PHP, Python, and MySQL. Aspiring Junior Web Developer with a strong focus on creating efficient, user-friendly web solutions and continuously improving technical skills.

EDUCATION

University of Bohol

Bachelor of Science In Computer Science

Tagbilaran City, Bohol

2022-2026

PROJECTS

Furniture Buy & Sell System

- Engineered a web-based buy and sell system using HTML, JavaScript, CSS, and PHP, increasing user engagement by ~40%.
- Implemented an admin management feature to streamline product management, enhancing operational efficiency.
- Ensured responsive design for optimal user experience across devices, resulting in positive user feedback.

Motomatch

- Designed a web-based application that allows customers to track product availability, reducing inquiries by ~25%.
- Collaborated with team members to develop user-friendly interfaces, enhancing customer satisfaction.
- Deployed the solution with rigorous testing to ensure high performance and reliability.

Image Editor

- Developed an image editor featuring various tools such as Filters, Color Detection, and Enhancers, utilized by ~150 users.
- Streamlined the image processing workflow, leading to a ~30% reduction in user editing time.
- Conducted user testing sessions to gather feedback, refining features for improved usability.
